

## **Year-round Pest Prevention Program**

The year-round pest prevention program will eliminate your pest control worries. The year-round program prevents pest entry to your home by focusing on its exterior. Applications will be made three times a year to season specific areas that insects tend to nest or enter your home. This convenient service will not disrupt your schedule and does not require anyone to be home at the time of treatment.

### **Year-round Program Schedule**

Spring –

Exterior Barrier Application: The spring EBA is an exterior application designed specifically to prevent the nesting of wasps. Treatment will focus on the peaks, windows, gutters, and eaves of your home

Midsummer -

Exterior Barrier Application: The midsummer EBA will focus on ground nesting insects with special attention being given to ants and yellow jackets.

Fall\* -

Exterior Barrier Application: The fall EBA is a treatment of your home's exterior to prevent the gathering of Box Elder Bugs and Asian Lady Beetles. The fall EBA is also a very effective treatment for controlling crawling insects that may try to enter your home.

\*if necessary placement of rodent baiting stations and/or traps will be performed at this time.
